Faus Group, Inc. is pleased to announce that the United States Patent and Trademark Office has approved the patent application filed by Faus, which broadly covers the Embossed-In-Register® laminate flooring technology developed by Faus.

The Embossed-In-Register® laminate flooring technology brings an authentic look and feel of natural wood, ceramic and stone that surpasses previously available laminate flooring products.

The approved patent application also covers the Joint Guard® Glueless System technology. This process, which was also developed by Faus, protects the joints and seams of the laminate floor planks to prolong the life of the product.

Patent Awarded!

We are pleased to be the preeminent source of innovation for the laminate flooring industry and are excited about our next leap over the horizon.
