FAUS GROUP INTRODUCES NEWEST INNOVATION: FASTDESIGN™

Dalton, GA – Faus Group, Inc. (“Faus”), is pleased to announce the introduction of FastDesign™, the latest design innovation breakthrough in laminate flooring. The launch will take place during the Surfaces 2006 trade show in Las Vegas Feb. 1-3.

FastDesign™ is a multi design system. Out of one SKU, you can have five different floor designs – depending on how you stagger the planks during installation. One SKU. One package. Five floors.

The designs choices include herringbone, diamonds, large spirals, small spirals and combinations of the four. The options are endless.

With this innovation, Faus is providing consumers with sophisticated design choices at a fraction of the price of real herringbone or diamond hardwood flooring. In the past, these pattern compositions have been so complex that only professional installers could create them. With FastDesign™, the installation is simple and DIY-friendly.

Faus is a leader in design and technology innovation. Faus manufactures products designed to meet consumer demands for laminate flooring and moldings of the highest level. Always a step ahead, Faus brings advanced expertise to the laminate floor industry by offering patented products and features that take laminate flooring to the next level.
