

FausFloors

Faus expands its Interplank concept of finely crafted wood designs, which extend across boards to mask the edges with FastDesign, a series of wood look products on 1' x 4' planks. They can be installed to create a variety of custom wood looks like herringbone, scroll and diamond patterns.

The firm is also showcasing its new Multi-Direction Design, which translates Interplank into stone and tile looks in various sizes and gloss levels.

Booth #4733

Faus' Multi-Direction Design.
