FOR IMMEDIATE RELEASE

FAUS GROUP ANNOUNCES \$20 MILLION INVESTMENT FOR EXPANSION OF PRODUCTION CAPABILITIES

Calhoun, Georgia, - Aug. 21, 2007 - Faus Group, Inc. ("Faus") announced today that the company has made an additional investment of \$20 million for the manufacturing of laminate flooring at its Calhoun Plant.

Faus will significantly expand its current manufacturing capacity by adding a second milling line in January 2008 that will increase its milling production up to 100,000,000 square feet per year. Additionally, four more presses will be added during 2008 that will further enhance its production capabilities.

"We all know that the flooring industry is presently going through a difficult economic situation, however, we are making this additional \$20 million investment because we are convinced it will maximize our efficiency in the manufacturing of high-end laminate flooring, as well as positively strengthen the company's partnerships with key customers in the US market." said Juan B. Flores, president of Faus Group, Inc.

Faus Group's main motivation behind this expansion is the savings that will be achieved by bringing manufacturing proficiency and knowledge from Europe to Calhoun that will help it increase its manufacturing capacity. The increased production volumes will provide the consumer with more cost-effective, high-end laminate flooring.

The company began US operations in July 2006 after purchasing a 78-acre, 400,000 square feet facility in Calhoun, Georgia.

Faus is a real global leader in the laminate industry, with manufacturing facilities in Europe, Asia and the United States. Always the leader in design and technology innovation, Faus manufactures products designed to meet consumer demands for laminate and moldings of the highest level.
