FOR IMMEDIATE RELEASE

## **FAUS GROUP, INC. INTRODUCES FASTRIM® METAL AND FASTAIR®**

**Calhoun, GA** – Faus Group, Inc. (“Faus”) introduces new multi-transition finishing options in flooring, FasTrim® Metal and FasTair®.

FasTrim® Metal is a universal transition system for all types of flooring including carpet, vinyl, commercial VCT, ceramic and hardwood. Each 78” package is easy to install and contains all necessary components to create four different transitions.

“FasTrim® Metal is simple to install and works in even the trickiest transition problems,” said Steve Ehrlich, director of marketing for Faus. “This truly is the most versatile finishing accessory on the market.”

The double swivel joint provides compensation even with considerable level changes and the unique rotating parts offer two further installation possibilities. There are also exchangeable distance pieces for large height differences and a grooved tread for maximum safety.

FasTair® is a stair nose finishing accessory that easily accommodates virtually any tread thickness, regardless of material. When installed, the completed stair nose will have a very low profile to eliminate trip hazards. FasTair® is also grooved for additional safety.

“This innovative product uses the latest in design technology to work with a wide variety of stair configurations and virtually any material,” said Ehrlich.

FastTrim® Metal and FasTair® are rated for both residential and commercial use, and the new multifunctional transition profile allows any builder to finish an edge or compensate for height difference with the flick of a wrist.

Each accessory is extremely durable and comes in silver, gold and pewter.
